ABOUT ME

- Seasoned global engineering leader with over 13+ years of experience driving products and services for leading organizations.
- I've planned and executed multiple journeys from **0 to 1, and scaled them beyond**.
- Successfully led geo-disbursed cross-functional teams (**90+ members in total**)
- I **mentor and develop engineers across all levels** while defining clear roadmaps and guidelines
- Experienced in building, scaling, and modernizing high-impact **B2B/B2C** products (**On-prem, SaaS, PaaS, Streaming, Payments**) using **cloud-native, distributed, web, mobile** technologies for enterprise needs.
- Skilled in scaling **talent acquisition, driving retention and engagement, developing skills, nurturing leaders**, and fostering community growth.
- Proven track record of **improving practices, tools, and processes** to boost productivity and quality, while enforcing modern engineering standards.
- Experienced in **managing budgets and resources** to optimize operational efficiency.

TECHNICAL SKILLS

Languages: GenAI, Golang, JavaScript, TypeScript, Python, SQL, MongoDB, HTML/SCSS/CSS, C#, Sprinklr, DotNet Core 2.x, Java v8.x

Frameworks: React, Node.js, Next.js, Nest.js, Loopback, Svelte.js, Vue.js, Vite, Jest, Vitest, GraphQL, Angular, Razorpay, Stripe, Netflix Conductor

Dev Tools: Git, Docker, Kubernetes, Firebase, Google Cloud Platform, AWS, Serverless, Vercel, Heroku

EXPERIENCE

BT (Broadband, OTT & Telco)

Gurgaon, Haryana

Solution Architect (prev. Engineering Manager)

10/2023 – Present

- Accountable for driving core products and services at business.ee.co.uk using best engineering practices and software while ensuring excellent customer experience.
- Increased customer **conversion rates by up to 70% and sales by 60%**, while managing metrics to retain lost or inactive customers.
- Achieved **£1.5M AWS infra cost savings** through optimization initiatives while enhancing DevOps practices to improve efficiency, scalability, and delivery pipelines.
- **Reduced lead time by 30% and MTTR by 50%**, enabling faster delivery cycles and improved system reliability.
- Transitioned from a legacy AMS stack and multiple third-party vendors to a modern platform, **reducing costs by over £5 million**.
- Conducted **A/B tests** and optimized website traffic, delivering **personalized multi-layered experiences** based on geography, purchase behavior, and other factors.
- Led engineering efforts that boosted flagship product sales by ensuring seamless **handling of millions of requests, with automated error detection, alerting, and resolution—achieving high reliability** and very minimal downtime.
- Led the integration of **GenAI with Sprinklr to automate customer query handling**, overseeing bot-driven issue resolution, qualification, and intelligent customer routing.
- Led a program that improved engineering **team efficiency by 20%** while fostering cross-team collaboration through POCs and hackathons.
- **Cut technical debt by 30%**

Getir (Fast Delivery E-commerce)

Turkey

Technical Lead

03/2022 – 08/2023

- Shaped the **flagship franchise project**, driving **improvements in daily operations across hundreds of warehouses** and ensuring alignment with business goals.
- Provided strategic oversight and hands-on support to **optimize warehouse workflows and operational efficiency**.

- Drove the development and enhancement of **mobile apps for food delivery customers and couriers**, improving usability and performance.
- Led and supported regional **hiring initiatives**, enabling effective recruitment of couriers, riders, and store assistants.
- Directed the migration to a **micro-frontend architecture**, enhancing scalability and maintainability of the platform.
- Scaled and optimized the backend of the core product to efficiently **handle millions of daily requests**.

Chegg (E-learning & Subscriptions)

Jasola, Delhi

Sr. Software Engineer / Lead

07/2020 – 03/2022

- Oversaw performance, functionality, and accessibility improvements for chegg.com, **impacting millions of users during a major migration**.
- Led the transition of marketing (SEO) and legal pages from **legacy systems to a modern technology stack**, improving maintainability and delivery speed.
- Acted as a liaison between engineering and business teams, ensuring alignment of goals and clear communication across stakeholders.
- Drove the **development of an automation tool** enabling product teams to independently create product and landing pages, reducing engineering dependencies.
- Fostered a culture of continuous improvement through **code quality standards, automation, and performance monitoring**.
- **Mentored engineering leads and senior developers** to enhance ownership, delivery, and cross-team collaboration.

Nagarro (Revenue Management & Reporting)

Gurgaon, Haryana

Associate Staff Engineer

12/2018 – 07/2020

- Worked on developing and maintaining a revenue management application for a major client.
- Helped implement features such as order management, recurring payments, and reporting, contributing where required.
- Delivered a solution that streamlined operations and improved revenue management.

Planetcast Media (Streaming, OTT, Transcription)

Noida, UP

Software Developer

05/2017 – 12/2018

- Developed in-house applications for satellite streaming, monitoring, live charts/logs, and timeline management, and contributed across functions as needed.
- Ensured audio, video, subtitles, and logos were synchronized for partner channel broadcasts.

Cissoft Technologies (ERP Software with Reporting and Payment Gateway)

Bareilly, UP

Software Developer

05/2014 – 04/2017

- Contributed to testing and developing ERP software for schools and colleges.
- Automated live report generation, timetables, and the management of fees, libraries, and payroll.

OPEN/CLOSED-SOURCE CONTRIBUTIONS

StorageX

Author & Maintainer

11/2022 – Present

- Developed an all-in-one localStorage/sessionStorage/cookie manager.
- Created a browser extension for evergreen browsers.

Beesy: Record Google Meets (<https://thepira.com/beesy>)

Co-Author & Maintainer

01/2022 – Present

- Developed a secure, offline-first meeting recorder with automatic crash recovery, requiring no user signup.
- Automated the user workflow with customizable shortcuts, recording prompts, and automatic post-meeting downloads.

EDUCATION

IET

Computer Science

Alwar, Rajasthan

05/2010 – 04/2014

Kerala School

Secondary & Higher Secondary (10th & 12th)

Vikaspuri, Delhi

01/1998 – 01/2010
